## **DETAILED ACTION**

### ***Reasons for Allowance***

The following is an examiner's statement of reasons for allowance:

Claims 1-2, 5-11 and 13-20 are allowable over the prior art of record. The closest prior art of record Benson, teaches record deltas which include value information associated with records in directories, however it fails to teach delta buffers which include a logical key corresponding to a database of objects, these limitations being indicated in claim 1 as "a delta buffer configured to store a delta record, wherein the delta record characterizes a difference between the one or more data objects and a modified version of the one or more data objects, the modified version being a result of a change made by the business planning tool to the data objects accessed from the database, the data objects buffered in the data buffer having a logical key corresponding to the database of the data objects, a description of an aggregation level described by characteristics and key figures from which aggregates of the data object may be constructed", in claim 9 as "updating the data object in the data buffer with the delta record, the data object buffered in the data buffer having a logical key corresponding to the database of the data objects" and in claim 13 as "a delta buffer configured to store a delta record characterizing a difference between the one or more data objects and a modified version of the one or more data objects, the modified version being a result of a change made to the one or more data objects by the

business reporting tool, the business planning tool, or both, the data objects buffered in the data buffer having a logical key corresponding to the database of the data objects".

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
